TnWaste Forms Strategic Alliance

TnWaste is pleased to announce a partnership with Enviical Incorporated, a leader in construction & demolition waste tracking, to provide turnkey solutions under TnWaste's construction recycling programs.

Enviical's tracking system expands TnWaste's ability to offer planning, tracking and reporting services to their recycling programs. "By combining our recycling services with Enviical's tracking systems, it is a win-win for both companies and our customers," said Larry Seivers of TnWaste. "It's a simple process ... customers put everything into one container and we haul the waste, sort the recyclables and report to the client. All they have to do is sign the paperwork."

"With the construction industry shifting to more eco-friendly practices, it just makes sense to combine our resources with TnWaste to offer improved recycling services," said Marc Fontinell of Enviical, Inc.
